MINOR: Not a valid, too short email address is accepted for registration

Bug Report ID: *	TT_ER_02	Bug Severity: *	3
Feature Name: *	R E G I S T R A T I O N		
Bug Title: *	Not a valid, too short email address is accepted for registration		
Bug Description: *	The registration process is corrupted by accepting too short email address. To be specific there is no validation for the email address attributes minimum length validation. Therefore, an email like B@G.S can be registered in the system.		

Pre-conditions:	<ol style="list-style-type: none">1.User`s email address is not been registered2.The users provides valid password at the registration password input field
------------------------	--

#	Steps to reproduce *
1.	Navigate to the Tech Tour Event Registration page
2.	Enter user`s email address in the registration form field " Email " as b@g.s "
3.	Enter user`s password in the registration form field " Password " as " 12345 "
4.	Click on registration form submit button known as "Sign up"

Expected Result: *	<ol style="list-style-type: none"> 1. There is no “Successful registration” message 2. There user stays at the Tech Tour Event Registration page 3. An error message is shown: <ol style="list-style-type: none"> 3.1. An error message down from the “Email” registration input field is presented as “Please enter a valid business email”
Actual Result: *	<ol style="list-style-type: none"> 1. The email address is accepted as a valid from the system
Project phase:	Acceptance Testing

MAJOR: “Authenticate” status from the event registration progress bar is missing

Bug Report ID: *	TT_ER_03	Bug Severity: *	3
Feature Name: *	R E G I S T R A T I O N		
Bug Title: *	“Authenticate” status from the event registration progress bar is missing		
Bug Description: *	The first step from the event registration for already registered users is to authenticate with valid email or password. However, when the user is logged in the system the Progress bar status “Authenticate” is not longer shown and therefore the user cannot go one step back in the event registration flow.		

Pre-conditions:	1.User`s email address is registered 2. The user provides valid password
Dependencies:	

#	Steps to reproduce *
1.	Navigate to the Tech Tour event registration page
2.	Enter user`s email as “B@G.S”
3.	Enter user`s password as “12345”
4.	Click on the “Sign up” button

<p>Expected Result: *</p>	<ol style="list-style-type: none"> 1. The user is redirected the second Tech Tour event registration page for Personal Details 2. The event registration progress bar is pointing “Personal Details” 3. The event registration progress bar „Authenticate” is clickable 4. There is a “Previous” button at the event registration bar allowing the user to go one step back from the current event registration progress bar status.
<p>Actual Result: *</p>	<ol style="list-style-type: none"> 1. The user is redirected the second Tech Tour event registration page for Personal Details 2. The event registration progress bar is pointing “Personal Details” 3. The event registration progress bar „Authenticate” is missing 4. There is no “Previous” button at the event registration bar
<p>Expected Result: screen shot</p>	 <p>The screenshot shows a web browser window with the URL 'demo-techtour-app-1.upnetix.tech/#/public/events/2633373/registrations/3414490'. The page is titled 'Register for an event: Healthtech Summit 2019'. The progress bar at the top indicates the current step is 'PERSONAL DETAILS'. The form includes fields for 'Title', 'First Name', 'Last Name', 'One line about yourself', and 'Biography (min 100 characters)'. There are also checkboxes for 'How do you want to be recognized in the community?' and 'Choose the stream(s) you are interested in for this event.' The 'Previous' button is missing from the progress bar.</p>

<p>Actual Result: screenshot</p>

Blocker: Registering a new user for health event is blocked by error message “Your registration was not completed. Project has no Id”

Bug Report ID: *	TT_ER_04	Bug Severity: *	1
Feature Name: *	R E G I S T R A T I O N		
Bug Title: *	Registering a new user for health event is blocked by “Your registration was not completed. Project has no Id”		
Bug Description: *	This is a end to end testing of the registration flow with valid data known as “happy path – end to end”. The registration is not completed due to a registration error. To be specific “Your registration was not completed. Project has no Id”.		

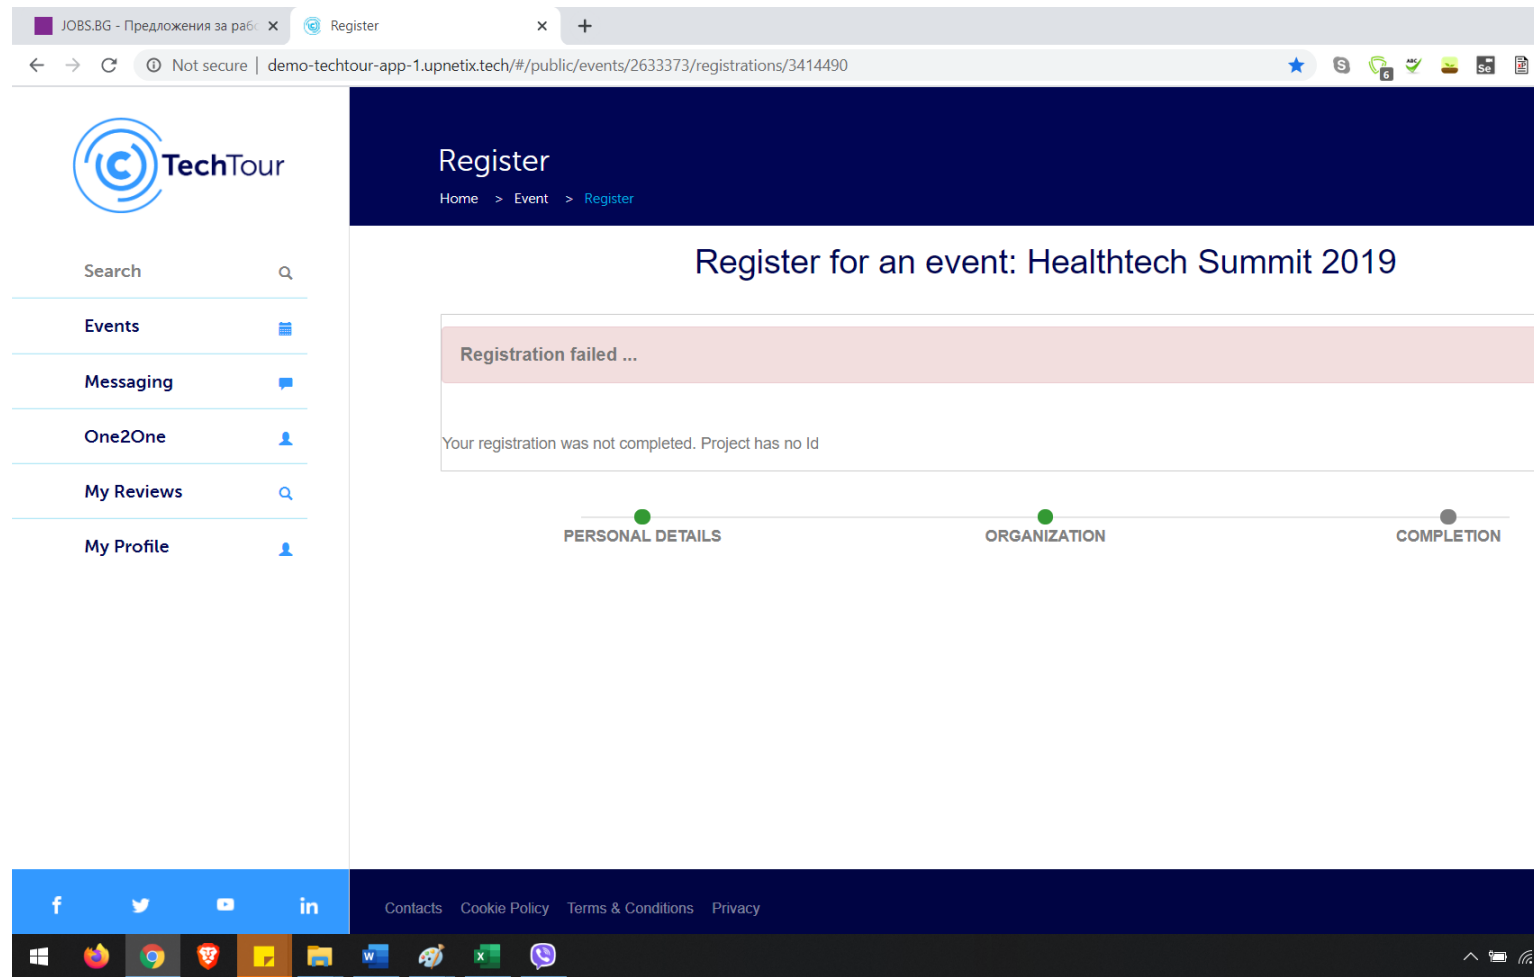

Pre-conditions:	1.User`s email address is not registered 2. The user provides valid password
Dependencies:	

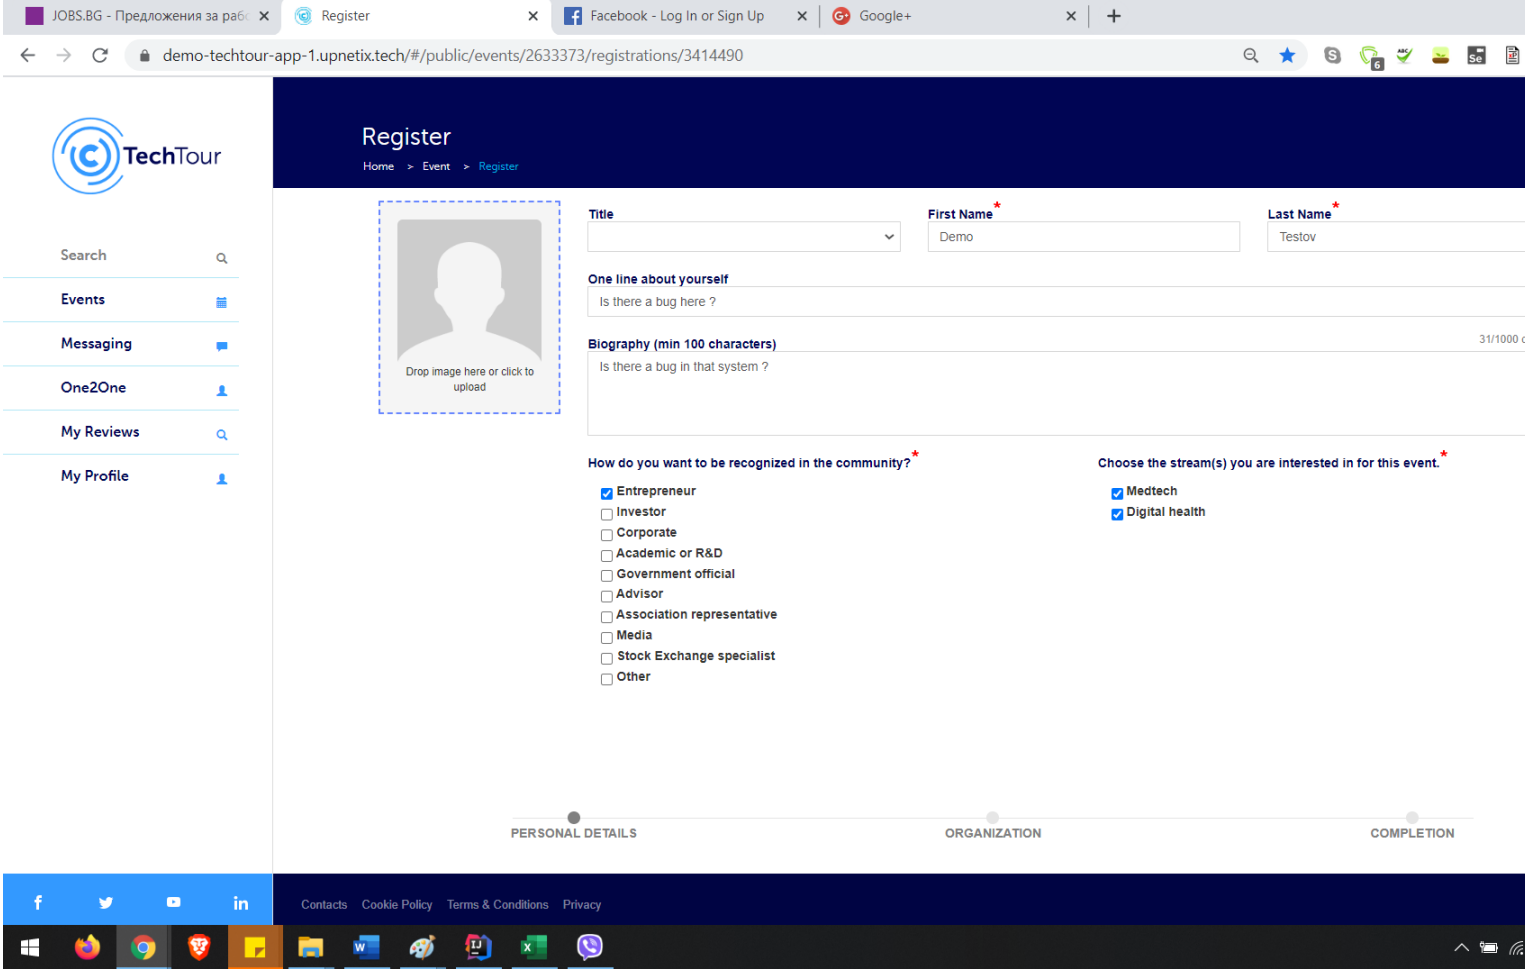

#	Steps to reproduce *
1.	Navigate to the Tech Tour event registration page
2.	Enter user`s email as “B@G.S”
3.	Enter user`s password as “12345”
4.	Click on the “Sign up” button
5.	Enter fist name as “Demo”
6.	Enter last name as “Testov”

7.	Select "Investor" form the role list
8.	Select "Medtech" and "Digital health" from streams options
9.	Click on "Next" button
10.	Search for organization starting with "Abc"
11.	Click on join button at the row of "Abcom (Tirana,Albania)"
12.	Click on "Create new project"
13.	Check the box for "Terms and Conditions" & "Privacy Policy"
14.	Click on register button

Expected Result: *	1. The user is successfully registered for a heath event at Tech Tour website
Actual Result: *	1. The user is not registered for a health event at Tech Tour website 2. The evet registration progress bar shows status "Completed"

Expected
Result:
screen shot

Project Name:	TechTour Event Registration Page

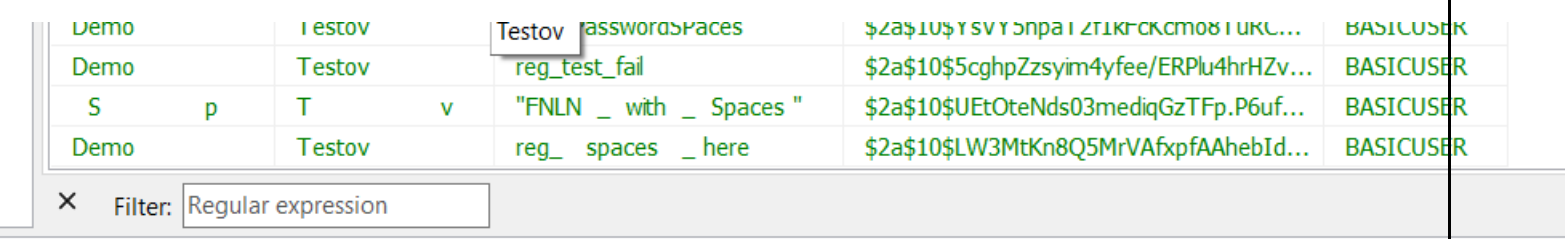

MAJOR: Register for event page is not redirecting the user for the login page

Bug Report ID: *	TT_ER_Page_03	Bug Severity: *	3
Feature Name: *	R E G I S T R A T I O N		
Bug Title: *	A logged-in user is not		
Bug Description: *	Due to sending username and password with spaces the login functionality is getting hard. Because some users didn`t know that spaces are required in order to get into the web-app or that during the registration flow they press the space accidentally. Furthermore, there is no option for username or password change/reset so the user is obliged to use the password entered during the registration process.		

Pre-conditions:	1.User`s email address is not been registered 2.User`s username is not been registered
Dependencies:	

#	Steps to reproduce *
1.	Navigate to the Login page
2.	Click on the link for registration - "Sign up".
3.	Enter user's first name in the registration form field " First name " as " S p "
4.	Enter user's last name in the registration form field " Last name " as " T v "
5.	Enter user's email address in the registration form field " Email " as " reg_ spaces _ here "
6.	Enter user's phone number in the registration form field " Phone " as "111222333555"
7.	Enter user's address in the registration form field " Address " as "13 Friday Avenue "
8.	Enter user's username in the registration form field " Username " as "REG_TEST_01"
9.	Enter user's password in the registration form field " Password " as " 12"
10.	Retype user's password in the registration form field " Confirm password " as " 12"
11.	Click on registration form submit button known as "SIGN UP"

Expected Result: *	<ul style="list-style-type: none"> 3. There is no "Successful registration" message 4. There user stays at the registration page 5. An error message is shown: <ul style="list-style-type: none"> 5.1. An error message with arrow to the "Username" registration field is presented as "Please enter valid user name" 5.2. An error message with arrow to the "Password" registration field is presented as "Please enter valid password"
Actual Result: *	<ul style="list-style-type: none"> 1. The registration form details are saved in the DB 2. The user is not Enabled
